TABLE OF CONTENTS

PREFACE

TABLE OF CONTENTS

1. INTRODUCTION	1
1.1 Statement of the Problem	1
1.2 The Concurrency Control Problem for Database Management Systems	4
1.3 The Concurrency Control Problem for Transaction Systems	8
1.4 Related Work	12
PART I: THE CONCURRENCY CONTROL PROBLEM FOR DATABASE MANAGEMENT SYSTEMS	18
2. DATABASE SYSTEMS	19
2.1 Database Systems without Restarts	20
2.2 Database Systems with Restarts	27
2.3 Assessing the Models	29
2.4 Correctness Criteria for Database Systems	29
3. GENERAL PURPOSE SCHEDULERS	33
3.1 Characterization of General Purpose Schedulers	33
3.2 Herbrand Interpretations	36
4. LOGS	37
4.1 Basic Definitions	37
4.2 Relating Logs and Computations	39

5.	CORRECTNESS CRITERIA FOR GENERAL PURPOSE SCHEDULERS	41
5.1	Weak Serializability	42
5.2	Variations of Weak Serializability	49
5.3	Conflict Preserving Serializability	53
5.4	Extending the Results to Database Systems with Restarts	56
6.	CONSTRUCTING GENERAL PURPOSE SCHEDULERS	57
6.1	Basic Design Decisions	58
6.2	Schedulers for Systems without Restarts	60
6.3	Schedulers for Systems with Restarts	64
7.	CONFLICT-PRESERVING SCHEDULERS	67
7.1	Basic CPSR Strategy	68
7.2	Refined CPSR Strategy	70
7.3	An Aggressive CPSR Scheduler	78
PART II: THE CONCURRENCY CONTROL PROBLEM FOR TRANSACTION SYSTEMS		83
8.	DATABASE DESCRIPTION	84
8.1	Many-Sorted Languages	87
8.2	Special Many-Sorted Languages	89
8.3	Special Many-Sorted Theories	92
8.4	Relational Databases	95
8.5	Examples	96

VII

9. DATABASE MANIPULATION	98
9.1 Many-Sorted Regular Programs	100
9.2 Many-Sorted Concurrent Programs	104
10. CONCURRENT DYNAMIC LOGIC	109
10.1 Formal System	110
10.2 Examples	115
11. CORRECTNESS OF TRANSACTION SYSTEMS	119
11.1 Correctness Criteria for Transaction Systems	120
11.2 Proving Relative Serializability by Conflict Analysis	127
11.3 Extending Conflict Analysis	142
11.4 Proving Relative Serializability for a Special Class of Transaction Systems	148
11.5 Proving Consistency Preservation	162
11.6 Comments	164
12. CONCLUSION AND DIRECTIONS FOR FUTURE WORK	167
